Consideration of Revisions to Policy JLCD and Regulation JLCD-R Medicines / Administering Medicines to Students (first reading)

Dr. Kamerzell presented the first reading of the proposed revisions to the district's current policy and regulation. The primary reason for the changes is to comply with Arizona Revised Statutes on the duties of the State Board of Education to adopt rules for the use of auto-injectable epinephrine and the required duty of a governing board to prescribe procedures for the emergency administration an opioid antagonist.

Dr. Kamerzell reviewed the language that was added to the policy on the training and rules for proper use of auto-injectable epinephrine, anaphylactic shock symptoms and the purchase of auto-injectors through monetary donations, grants and/or 3rd-party programs. Language was also added regarding the emergency administration of an opioid antagonist, including the exemption from civil liability, the need for a doctor's prescription or pharmacist's protocol, and that the district is not required to request or purchase the drug.

If responding to an opioid overdose, the school will call an emergency response provider, administer an opioid antagonist which was provided by a person who lawfully obtained it, and in response to a health care plan created by that person and the school for a student who requires naloxone as an emergency intervention.

Dr. Kamezell also reviewed other minor language changes that included adding legal guardian when referring to the parent, replacing drug or medicine with medication, and substituting qualified health care professional for specific professionals. The board will

review the policy and regulation for a second reading at its next meeting on March 26.
