Welcome to Foothills!

Catalina Foothills High School is an incredible place to learn for a host of reasons. We benefit from tremendous support from our community, and we are able to offer a rich, diverse program. The greatest predictor of college success is the rigor of the high school courses that students take. To that end, we offer challenging course pathways that prepare each graduate to soar.

If you come to our campus, you will see students engaged in an array of endeavors—from precise analysis of data sets in order to extrapolate scientific claims about the surface of Mars, to heated debate about the principles of democracy, to deep concentration to perfect a musical performance, to the struggle to find the exact word to convey a subtle emotion in a review, to curious inquiry about the properties of numbers themselves, and to many other diverse challenges.

Our teachers are skilled and committed; they hold high expectations for our students both about what students can do in the classroom while they are here and, more importantly, what they will be able to do in the world beyond our doors. Our students have remarkable opportunities open to them to pursue their intellectual, artistic, athletic, and civic passions within a setting that values, preserves, and promotes excellence. --Jody Brase, *Principal*
