

Mitigation Plan

Catalina Foothills School District is taking many steps to protect your child from the spread of COVID-19. The health and safety of your child at school is at the center of our planning. This plan will require ongoing monitoring and it may change as needed.

Following the Science

Implementation of CFSD's mitigation plan, as well as decisions on school opening and closures, will depend on public health conditions as guided by the Pima County Health Department (PCHD) and the Arizona Department of Health Services (ADHS) (Executive Order 2020-51). The PCHD recommends considering the current COVID-19 metrics that are found on the [Pima County COVID-19 dashboard](#) as a factor in the closing and re-opening of schools. Pima County metrics include *disease data, healthcare system availability and public health tracking and prevention* as benchmarks for the current status of the pandemic. Note that these current metrics are used in conjunction with [Arizona State Health Department guidance](#). This guidance outlines recommendations for K-12 schools to prepare for and respond to community spread of COVID-19 based on CDC's *K-12 Operational Strategy and Indicators for Dynamic School Decision Making*, and Arizona Department of Education's *Roadmap to Reopening Schools*. School districts are encouraged to continue to partner with their local health department. The Pima County Health Department (PCHD) recommendations on the closing and reopening of schools continue to be updated based on the changing pandemic situation. CFSD continues to track our own data as well.

In their December 2020 communication to superintendents, the PCHD made it clear that it supports each school district's decision based on its local COVID case experience. The COVID case counts in Pima County school districts vary significantly. As a result, the decisions about in-person or remote learning will differ as well and are made based on a school district's local circumstances.

On March 3, Governor Ducey issued Executive Order 2021-04 requiring all district and charter schools to return to in-person, teacher-led instruction no later than March 15. The Arizona Department of Health Services updated their public health and school dashboard to reflect the metrics utilized by the Centers for Disease Control and Prevention (CDC) and aligned their community transition phases with those identified in the CDC guidance *Operational Strategy for K-12 Schools Through Phased Mitigation* issued February 12, 2021. The dashboard includes the following categories: Low Transmission, Moderate Transmission, Substantial Transmission, and High Transmission. According to Executive Order 2021-04, an individual district or charter school may only close if the local health department advises closing an entire district school due to a significant outbreak of the COVID-19 virus that poses a risk to the students or staff and is approved for closure by the Arizona Department of Health Services.

Reducing the Spread

CFSD is implementing the following strategies to encourage behaviors that reduce the spread of COVID-19.

Staying Home when Appropriate

- CFSD is educating staff and families about when they/their child(ren) should [stay home](#) and when they can return to school. We also remind them what to do if they are feeling sick.
- We actively encourage employees and students who are sick or who have recently had [close contact](#) with a person with COVID-19 to stay home. The CDC defines a close contact as someone with any one of the following conditions:
 - Being within 6 feet of someone who has COVID-19 for a cumulative total of 15 minutes or more over a 24-hour period* starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated.
 - Providing care at home to someone who is sick with COVID-19
 - Kissing or hugging or in similar direct physical contact with the person
 - Sharing eating or drinking utensils
 - Having been sneezed on or coughed on
- Our policies encourage sick employees and students to stay at home, and ensure employees, students, and students' families are aware of these policies. CFSD does not give out perfect attendance awards. We offer remote learning and telework options, where feasible.
- Staff and students should stay home if they have tested positive for or are showing COVID-19 symptoms. Siblings of positive or symptomatic students must stay home as well.
- All household members of someone confirmed or suspected to have COVID-19 should not physically attend school and quarantine at home according to the [CFSD COVID-19 Isolation Decision Matrix](#). Keep in mind, siblings may be at the same school or at another school (age dependent). Should a student become sick, families should notify the schools of any household contact. If a sick student's household contact is in school, the contact's school should be notified and they should be removed from the classroom and sent home as soon as possible, even if not displaying symptoms. If the household contact is also sick, follow the steps above.
- Staff and students who have recently had [close contact](#) with a person with COVID-19 should also stay home and monitor their health.
- Fully-vaccinated staff must still follow all mitigation plan guidelines, but they do not need to quarantine if they received their last vaccination dose within the last 90 days.
- CFSD provides education to students about:
 - COVID-19 (e.g., symptoms, transmission, prevention)
 - What to do if they are feeling sick
 - Reasons for changes in school routines (e.g., cohorting, meals, gatherings, activities, and visitors)
 - Importance of the three W's to prevent illness:
 - Wearing a face covering

- Walking 6 feet apart
 - Washing hands
- CFSD provides additional information to employees on:
 - COVID-19 (e.g., symptoms, transmission, prevention)
 - Proper use, removal and cleaning of face coverings and how to assist students with these actions
 - Policies for enforcing social distancing
 - How to teach/model/monitor: hand washing/use of sanitizer; use/disposal of tissues for coughing, sneezing and wiping noses
 - How to respond if they or a student: is ill, has a possible exposure, has a confirmed exposure, has a positive test, and if the school has an [outbreak](#) (defined as two or more laboratory-confirmed cases among students from the same classroom within onsets within a 14-day period who are epidemiologically linked, do not share a household and were not identified as close contacts of each other in another setting during standard case investigation or contact tracing)
 - How the school will address illnesses for students and staff, and reporting requirements to the school and public health authorities
 - Employee policies (e.g., leave)
 - Reasons for changes in school routines (e.g. cohorting, meals, gatherings, activities and visitors)
 - State and local mitigation efforts
 - Employee role in health, hygiene and sanitation practices in the classroom and/or at school
 - When employees should return to work:
 - [If they have been sick with COVID-19](#)
 - [If they have recently had close contact with a person with COVID-19](#)
- CFSD provides videos and information to families about:
 - COVID-19 (e.g. symptoms, transmission, prevention)
 - COVID-19 screening and how school will respond to if a student: is ill, has a possible exposure, has a confirmed exposure, has a positive test, and if the school has an outbreak
 - What to do if someone in their home gets sick
 - Proper use, removal and cleaning of face coverings and how to assist children with these actions
 - School health, hygiene and sanitation practices
 - School policies on: Wearing a face covering, Walking 6 feet apart, Washing hands

Hand Hygiene and Respiratory Etiquette

- Together with our families, CFSD teaches and reinforces [handwashing](#) with soap and water for at least 20 seconds and increase monitoring to ensure adherence among students and staff. CFSD offers increased use of sinks and hand-washing stations, and hand sanitizer stations in high traffic areas at our K-5 schools. Portable and wall-

mounted hand sanitizer stations will be in use throughout our middle schools and high school when soap and water are not readily available.

- All elementary classrooms have sinks for handwashing, and all grade 6-12 classrooms will have hand sanitizer. Students will wash their hands with soap and water at least 20 seconds or use hand sanitizer at the following times:
 - Upon arrival at school
 - After being outside for physical activity
 - Before and after lunch
 - Prior to leaving school for home
- CFSD encourages staff and students to cover coughs and sneezes with a tissue. Used tissues should be thrown in the trash and hands washed immediately with soap and water for at least 20 seconds. If soap and water are not readily available, hand sanitizer that contains at least 60% alcohol can be used (for staff and older children who can safely use hand sanitizer).

Face Masks

- CFSD requires the use of [face masks for students and staff](#). We have provided education to students, staff and families about the importance of face masks through school announcements, posters, and social media. We remind students not to touch their face mask and to [wash their hands](#) frequently.
- [Face masks](#) are meant to protect other people in case the wearer is unknowingly infected but does not have symptoms. **Face masks** are not respirators, shields, valved masks, or other medical personal protective equipment.
- Face shields are provided to all certified staff and staff who work in SOS@CFSD, and may be worn over face masks to provide additional protection.
- Where physical distancing criteria are met, students may have face masks with them but not worn. This includes outdoor physical activity. Students will be physically distanced at lunch time, and will not require face masks during their time eating.
- We will provide a disposable face mask if a student arrives at school not wearing one. Parents may want to provide a pencil pouch to store additional face masks, so students are prepared.
- The policy for requiring face masks is based on county and state health guidance in conjunction with advisement from the Superintendent. The policy may be discontinued based on guidance from Pima County Health Department and/or Arizona Department of Health Services and advisement from the Superintendent.

Adequate Supplies

- CFSD supports [healthy hygiene](#) behaviors by providing adequate supplies, including soap, hand sanitizer with at least 60 percent alcohol (for staff and older children who can safely use hand sanitizer), paper towels, tissues, disinfectant wipes, disposable face masks (as feasible) and no-touch/foot-pedal trash cans.

Signs and Messages

- CFSD posts [signs](#) in highly visible locations (e.g., school entrances, restrooms) that promote everyday healthy measures and describes how to [stop the spread](#) of germs (such as by [properly washing hands](#) and [properly wearing a face mask](#)).
- We include messages about behaviors that prevent the spread of COVID-19 when communicating with staff and families (such as on school websites, in emails, and on school [social media accounts](#)).
- We broadcast school announcements and videos on how students can stay healthy.

Maintaining Healthy Environments

CFSD implements the following strategies to maintain healthy environments.

Cleaning and Disinfection

CFSD is enhancing the level of disinfection on each campus, which will include the following work by our cleaning team members:

- Twice daily checks of disinfection kits (disinfectant product, gloves and paper towels), which will be refilled as needed
- Twice daily checks of hand soap, paper towels and hand sanitizer, which will be refilled as needed
- Daily disinfection and cleaning of all desks, chairs and other high-touch surfaces such as door knobs and light switches, staplers, pencil sharpeners, computer keyboards and mice, in classrooms (both during the day, at extended break periods like lunchtime and at night when classrooms are vacant)
- Disinfection and cleaning of all high-touch, high-traffic and common areas throughout the school day. Cleaning team members will clean and disinfect frequently touched surfaces, including playground equipment, door handles, faucet knobs, drinking fountains, stair railings, interior lunch tables and seating, exterior tables and seating areas, countertops, handrails, buttons on vending machines and elevators, telephones, computer keyboards and mice, lockers, inboxes in classrooms and mailboxes in administration areas, restrooms, shared gymnasium equipment, and shared toys in preschool environment (multiple times per daytime shift and once at night)
- In the event that someone tests positive for COVID-19, the classroom will be sealed off and signage will be posted. The classroom will be closed for 24 hours, and the entire classroom will be atomized. Cleaning team members will use appropriate PPE equipment and dispose of it properly.
- Disinfect quarantined areas for students who have previously tested positive for COVID-19, but at least 72 hours has passed since exhibiting symptoms without the use of medication; and there has been an improvement in their respiratory symptoms; and 10 days have passed since symptoms first appeared; but two negative test results greater than 24 hours apart has not been determined. These quarantined areas will be disinfected via atomization after every break in class periods and appropriate PPE equipment will be provided to applicable staff members.
- Every campus will have the use of electrostatic disinfecting sprayers. Electrostatic technology works by using electrical charges to allow disinfectant to

electromagnetically stick to surfaces. The charge created also enables the disinfectant to wrap around surfaces that may not be directly exposed to disinfectant.

*Note: Disinfection does not necessarily clean dirty surfaces, i.e. remove pen/pencil marks or other visual imperfections, but rather is intended to kill germs to reduce the spread of infection.

Shared Objects

- CFSD limits sharing of items that are difficult to clean or disinfect.
- Each child's belongings are separated from others' belongings and are brought home each evening.
- CFSD ensures adequate supplies to minimize sharing of high touch materials to the extent possible and limits use of supplies and equipment by one group of children at a time and clean and disinfect between use.
- CFSD limits sharing electronic devices, toys, books, and other games or learning aids.
- Schools have physical distancing policies for accessing personal items.

Ventilation

- CFSD increased outdoor air ventilation.
- When weather and learning conditions allow, CFSD will increase fresh outdoor air by opening doors wherever possible.
- CFSD decreases occupancy in areas where outdoor ventilation cannot be increased, as in cafeteria spaces.
- CFSD ensures ventilation systems operate properly and provide acceptable indoor air quality for the current occupancy level for each space.
- CFSD increases total airflow supply to occupied spaces, when possible.
- CFSD has disabled demand-controlled ventilation (DCV) controls that reduce air supply based on occupancy or temperature during occupied hours.
- When weather conditions permit, we open minimum outdoor air dampers to reduce or eliminate HVAC air recirculation. In mild weather, this will not affect thermal comfort or humidity. However, this may be difficult to do in cold, hot, or humid weather.
- We increased outside ventilation to as high as possible without significantly diminishing design airflow.
- We inspected filter housing and racks to ensure appropriate filter fit and check for ways to minimize filter bypass
- We check filters to ensure they are within service life and appropriately installed.
- We run the HVAC system at maximum outside airflow for 2 hours before and after the school is occupied.
- CFSD has ensured restroom exhaust fans are functional and operating at full capacity when the school is occupied.
- We inspect and maintain local exhaust ventilation in areas such as restrooms, kitchens, and cooking areas.
- We evaluated the positioning of supply and exhaust air diffusers and/or dampers (especially in higher risk areas such as the nurse's office).
- CFSD uses air filters rated MERV 8. The recommended MERV 13 is too restrictive to operate in our systems without causing other complications.

- The ACH (air changes per hour) were designed to meet or exceed code at the time they were built. The ACH varies based on each room and its usage.
- CFSD uses portable HEPA filtration units (air scrubbers) in various locations on each campus, including health offices, administration lobbies, MPRs, and interior hallways.

Water Systems

- CFSD ensures water systems are safe to use after the shutdown.
- Drinking fountains will be available for bottle refills only.
- We encourage staff and students to bring their own water.

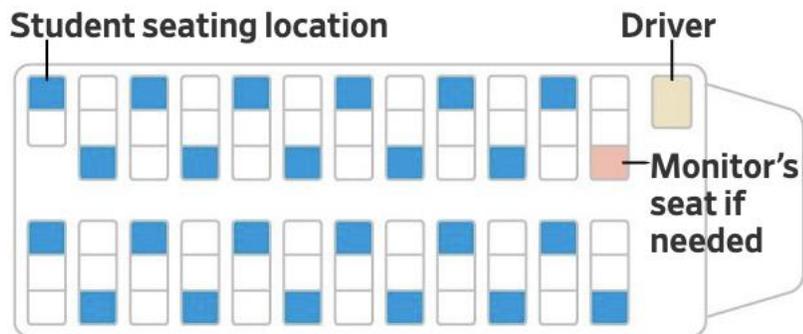

Modified Layouts

- CFSD spaces seating/desks 6 feet apart to the extent possible, but may be as low as 3 feet.
- CFSD recommends turning desks to face in the same direction (rather than facing each other), or have students sit on only one side of tables, spaced apart, where feasible.

School Buses

- Transportation will continue to be per state guidelines: Elementary (K-8) students who live beyond one mile from the school, and secondary (9-12) students who live beyond one and a half miles from their school are eligible for transportation services.
- Temperature Checks - It is expected that all students will have their temperature checked by their parent or guardian prior to arriving at their bus stop.
- Gatherings at bus stops - We encourage parents and students to wear face masks when waiting for the bus or preparing to enter the bus, especially when physical distance cannot be maintained. Also, we encourage to follow physical distancing guidelines at bus stops.
- Waiting in Line – Households are encouraged to stand in line together as a group. The next place in line should be a minimum of 6 feet back when possible.
- Boarding – Students will board the bus from back to front. By loading the back of the bus first we are limiting exposure to students by physical distancing, they do not have to walk past seated students.
- Hand Sanitizer – All bus occupants will be encouraged to use the hand sanitizer located on the inside of the bus upon entry to the school bus and again upon exiting the vehicle.
- Face Masks – All students (K-12) and staff will be required to wear face masks. If a student does not have their own face mask, one will be provided.
- Signage – Prominent COVID signage will be posted on the bus in an area visible to the students and parents as they approach the bus.
- Daily Sanitization – Drivers will be wiping down buses in between routes and all buses will be fully sanitized, each evening, using EPA-approved cleaning products.

- Ventilation – Some windows may be partially open during transit to increase ventilation.
- Seating – Where possible, students will sit throughout the vehicle, as shown. Tape markings will indicate where a student may sit.

Physical Barriers and Guides

- CFSD has installed physical barriers, such as sneeze guards and partitions, particularly in areas where it is difficult for individuals to remain at least 6 feet apart (e.g., reception desks).
- We provide physical guides, such as markers on floors or sidewalks and signs on walls, to maintain physical distancing in lines and at other times.
- Some guides indicate “one way routes” in hallways.

Communal Spaces

- The communal use of shared spaces is reduced and we [clean and disinfect](#) between use.
- The use of lockers is not permitted.
- All staff are reminded to practice physical distancing when in any common rooms that remain open.

Food Service

- CFSD serves grab-and-go meals with disposable food service items (e.g., utensils, dishes).
- Food service employees are encouraged to [wash their hands](#) after removing their gloves or after directly handling used food service items.
- No buffet or family-style meal service is offered. The sharing of food and utensils is not permitted.

Health Screenings

We expect you to complete a health check at home before sending your child to school.

Please keep your child at home if they show any of these symptoms:

- Fever of 100.4°F or higher
- Chills
- Cough

- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea, vomiting, or diarrhea
- Any other symptom of illness, whether or not you believe it's related to COVID-19

Finally, please keep your child at home if they have had a positive COVID-19 test. See our [Isolation Matrix](#) for additional guidance.

Employees will complete the same health check at home before leaving for work.

Immunizations

- CFSD recommends that all students and staff be immunized each autumn against influenza unless contraindicated by personal medical conditions, to help:
 - Protect the school community.
 - Reduce demands on health care facilities.
 - Decrease illnesses that cannot be readily distinguished from COVID-19 and would therefore trigger extensive measures for the district and public health authorities.

Recess, Sports and Non-Class Activities

- CFSD follows the AIA guidelines regarding sporting events and participation in sports activities in ways that minimize the risk of transmission of COVID-19 to players, families, coaches, and communities.
- Activities may be adjusted to adhere to latest public health recommendations. After-school activities only occur with physical distancing and mask use in physically-distanced groups.
- Schools will implement outdoor activity and instruction when possible.
- Schools will stagger/cohort recess to minimize contact with other class cohorts where possible.
- Schools will develop and implement strategies to restructure activities to support physical distancing with increased frequency of cleaning in sports facilities.

Maintaining Healthy Operations

CFSD implements the following strategies to maintain healthy operations.

Protections for Staff and Children at Higher Risk for Severe Illness from COVID-19

- CFSD offers reasonable accommodations for staff at [higher risk for severe illness](#) that

limit their exposure risk.

- CFSD provides options for students at [higher risk of severe illness](#) that limit their exposure risk (e.g., remote learning opportunities).
- Consistent with applicable law, CFSD protects the privacy of people at [higher risk for severe illness](#) regarding underlying medical conditions.

Gatherings, Visitors, and Field Trips

- CFSD offers virtual group events, gatherings, or meetings, if possible. No in-person meetings are held.
- No nonessential visitors, volunteers, and activities involving external groups are allowed.
- Essential permitted visitors on school grounds are instructed to follow guidelines on face masks, physical distancing, and hand hygiene, and they must limit movements to the area they were approved to visit.
- Schools have posted signs at entrances to the building advising that masks are required and no visitors may enter the building.
- CFSD plans virtual activities and events in lieu of field trips, student assemblies, special performances, school-wide parent meetings, and spirit nights, as possible.
- Schools have a student drop-off and pick-up procedure so that parents/guardians wait in their car for students to be dismissed. Staff members (in face masks) will monitor drop-off and pick-up.

Identifying Small Groups and Keeping Them Together (Cohorting)

- Where feasible, CFSD ensures that student and staff groupings are as static as possible by having the same group of children stay with the same staff.
- CFSD limits mixing between groups if possible.

Designated COVID-19 Point of Contact

- Each school designates a staff person to be responsible for responding to COVID-19 concerns (e.g., school nurse).

Participation in Community Response Efforts

- CFSD participates with local authorities in broader COVID-19 community response efforts (e.g., representing CFSD on Pima County Health Department and Pima County School Superintendents' committees).

Communication Systems

Consistent with applicable law and privacy policies, CFSD has a system for staff and families to [self-report](#) to the district if they or their student have [symptoms](#) of COVID-19, a positive test for COVID-19, or were exposed to someone with COVID-19 within the last 14 days in accordance [with health information sharing regulations for COVID-19](#) (e.g., see “Notify Health Officials and Close Contacts” in the Preparing for When Someone Gets Sick section

below) and other applicable federal and state laws and regulations relating to privacy and confidentiality, such as the Family Educational Rights and Privacy Act (FERPA).

When we are notified of an individual COVID case, we contact the Pima County Health Department (PCHD) and they begin the contact tracing process. After the PCHD has conducted its research, close contacts are immediately notified. **If your family is not notified, it means that the Pima County Health Department does not consider your student to be a close contact.**

Here are the specific steps that take place during the notification process:

1. The school health office and the school administration are notified.
2. The health office contacts Pima County via weblink.
3. The PCHD sends a survey to the school, who completes the survey and returns it back to the PCHD.
4. The PCHD works with the school to determine who needs to be notified.
5. The PCHD notifies the case and the school notifies the close contacts.

Given the urgency of the situation, some of these steps may happen simultaneously.

It is important to understand that all close contacts are directed to immediately begin a 14-day quarantine period at home. All other students can continue to attend school on their scheduled days.

Leave (Time Off) Policies and Excused Absence Policies

- CFSD implements sick leave policies and practices that enable staff to stay home when they are sick, have been exposed, or caring for someone who is sick.
- CFSD has developed policies for return-to-school after COVID-19 illness. CDC's [criteria to discontinue home isolation and quarantine](#) informs these policies.

Back-Up Staffing Plan

- CFSD monitors absenteeism of students and employees, cross-trains staff, and creates a roster of trained back-up staff.

Staff Training

- Train staff on all safety protocols.
- Conduct training virtually or ensure that [social distancing](#) is maintained during training.

Recognize Signs and Symptoms

- Families are the first point in the student's health screening continuum. Parents or caregivers are strongly encouraged to monitor their children for signs of infectious illness including COVID-19 every day.
- For in-person services, families must sign [a COVID-19 Waiver, Release, and Assumption of Risk](#) form.
- CFSD does not conduct universal symptom screenings (screening all students grades K-12) as per CDC guidance.

- Students who have symptoms of any infectious illness or symptoms consistent with COVID-19 should not attend school in-person. The student’s siblings should not attend school, either.
- When health checks are needed, they are conducted safely and respectfully, and in accordance with any applicable privacy laws and regulations.

Support Coping and Resilience

- CFSD encourages employees and students to take breaks from watching, reading, or listening to news stories about COVID-19, including social media if they are feeling overwhelmed or distressed.
- For our employees and students, we promote healthy practices like eating nutritiously, exercising, getting sleep, and finding time to unwind.
- We encourage employees and students to talk with people they trust about their concerns and how they are feeling.

Calendar Considerations

- Due to the school year starting one week later than originally planned, the 2020-2021 calendar captures an offset of 5 days during the year reallocated to instructional days: 3 days during the fall break and 2 days the last week of May. The last day of the school year will be Friday, May 28.

School Closure Considerations

- CFSD is working with PCHD to forecast situations in which schools may be required to close in the future based on the potential number of contacts, distribution of cases throughout the school, size of the school, and vulnerability of the population, along with other factors.
- CFSD will move to remote learning in the event of intermittent closures.
- CFSD will notify staff and families of closure through School Messenger and social media.

Preparing for When Someone Gets Sick

CFSD implements the following strategies to prepare for when someone gets sick on campus.

Advise Staff and Families of Procedures for Cases, Contacts and Exposures

- Sick staff members or students should not return until they have met CDC’s [criteria](#). See the [CFSD Isolation Decision Matrix](#).
- CFSD monitors student and employee absences.
- CFSD regularly updates our procedures for cases, contacts and exposures.
- CFSD communicates changes to these procedures to employees and families through our website, email and social media channels.
- CFSD consults with Pima County Health Department if there are cases in a school or an increase in cases in our local area.

Isolate Those Who are Sick

- CFSD makes sure that staff and families know that they (staff) or their children (families) should not come to school, and that they should notify school officials (e.g., the designated COVID-19 point of contact) if they (staff) or their child (families) become sick with COVID-19 [symptoms](#), test positive for COVID-19, or have been [exposed](#) to someone with COVID-19 symptoms or a confirmed or suspected case. Siblings of symptomatic students should stay home as well.
- CFSD immediately separates staff and [children](#) with COVID-19 [symptoms](#) (such as fever, cough, or shortness of breath) apart from other students and staff at school. Individuals who are sick should go home or to a healthcare facility depending on how severe their symptoms are, and follow [CDC guidance for caring for oneself and others](#) who are sick. See the [CFSD Isolation Decision Matrix](#).
- Every school has identified an isolation room or area to separate anyone who has COVID-19 symptoms or tests positive but does not have symptoms. School nurses and other healthcare providers should use [Standard and Transmission-Based Precautions](#) when caring for sick people. See: [What Healthcare Personnel Should Know About Caring for Patients with Confirmed or Possible COVID-19 Infection](#).

Clean and Disinfect

- CFSD will close off areas used by a sick person and will not use these areas until after [cleaning and disinfecting](#).
- CFSD will wait at least 24 hours before cleaning and disinfecting. If 24 hours is not feasible, we will wait as long as possible.

Notify Health Officials and Close Contacts

- In accordance with state and local laws and regulations, school administrators will
- notify [local health officials](#), staff, and families immediately of any case of COVID-19 while maintaining confidentiality in accordance with FERPA. School staff shall notify Pima County Health Department by filling out a [School Communicable Disease Report](#). Once completed return to the Pima County Health Department by faxing (520) 838-7538, or calling (520) 724-7797.
- When possible, schools will keep a list of symptomatic students, staff, and their close contacts, to assist contact tracing efforts.
- CFSD informs those who have had [close contact](#) with a person diagnosed with COVID-19 to stay home and [self-monitor for symptoms](#), and follow [CDC guidance](#) if symptoms develop.

Returning to School

- CFSD offers guidance on when it is safe for a student who recovered from COVID-19 to return to school. See [CFSD COVID-19 Return-to-School Guidance](#).
